## The Modern GI Platform for Intuitive Endoscopy
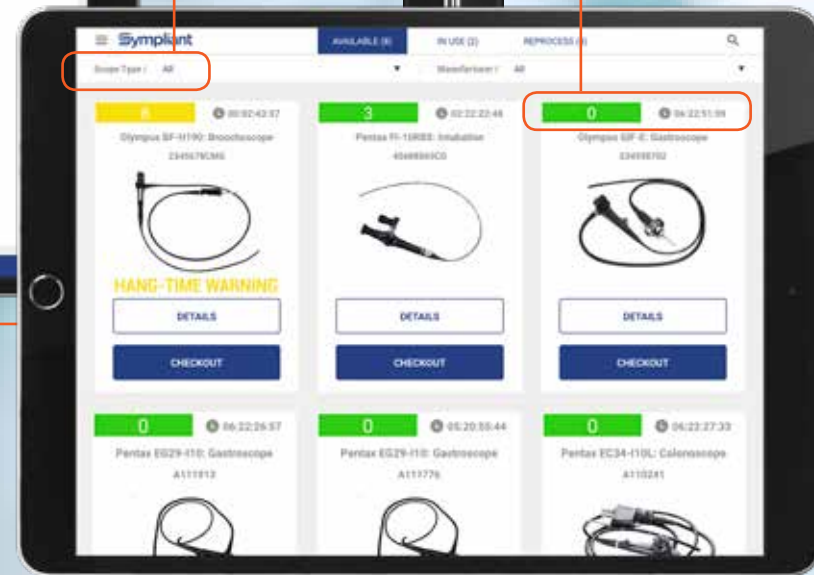

# DELIVER HEALTHCARE WITH CONFIDENCE

**Sympliant** is ushering in a new standard for today's GI suites. The intuitive digital platform gives healthcare professionals the ability to comprehensively manage reprocessing, compliance, documentation and reporting across devices and systems.

Revolutionary Paperless Documentation

Confident & Modern Healthcare Compliance

Comprehensive GI Suite Management

built-in custom sorting features to quickly view and compare scope metrics

easily view and manage endoscope statuses

robust reporting features allow for detailed data aggregation

scalable to streamline processes and workflows for any size facility

in-depth digital audit template provides quantifiable infection prevention metrics to ensure uniform completion and documentation of safety protocols

comprehensive dashboard shows full view of endoscope inventory, current hang-times and reprocessing status

## Scope Check-In/Check-Out
User-friendly interface simplifies, manages and verifies endoscope check-in and check-out with intuitive documentation of safety protocols.

## Detailed Scope Analytics
Allows user to view endoscope specific information including an efficient built-in scope repair scheduler and access to service, reprocessing, status, and storage records.

## Hosting Options
Sympliant offers users the choice to self host or Cloud host with access across multiple device types.
